ABEL LOPEZ MESA

Software Engineer

Brandon, FL 33511 **Cell: (863) 233-8116**
United States **lopezmesa@gmail.com**

SUMMARY OF QUALIFICATIONS

- Visionary and result oriented IT professional with over 20 years of software development and stronger know-how of the pharmaceutics industry, transportation, restaurant and supermarket with ERP solutions.
- Strong technical foundation including; PostgreSQL, C#, VB.Net, DOTNETNUKE, ASP.Net, ASP.Net MVC, PHP, Synphony, jQuery, understanding of relational database concepts and structures, knowledge of SQL, structured system analysis and design methods, etc.
- A best results in understanding and getting in a practice all software live cycle in a team of software development including requirements gathering, analysis, design, writing code, debugging and unit testing
- Extensive experience in Architecture, designing, developing (interfaces, functionalities, Integration between systems and components, data migration) for medium and enterprise-wide systems.
- Solid understanding and experience Service Oriented Architecture (SOA), Software Design Patterns
- Capable of driving and managing the full software development life cycle (SDLC) in **agile/scrum methodology** TFS.
- In-depth experience of performing data analysis, data modeling, data mapping, batch data processing and capable of generating reports using reporting tools such as Business Objects, Crystal Reports.
- Consulting experience including delivery of large projects covering envisioning, effort estimation, analysis, proposal development, and successful delivery.
- Highly organized with excellent communication, interpersonal, and presentation skills.

PROFESSIONAL EXPERIENCE

HeavenEx Lead Software Engineer **May 2024 - until present**
(Product development)

Client: **HeavenEx**
Website: HeavenEx.com
Project: Crypto exchange, P2P
Technologies: Python, PostgreSQL
Scope: HeavenEx is a comprehensive platform designed for working with cryptocurrencies, offering users a seamless experience for managing their digital assets. It enables P2P exchanges, crypto conversions, deposits, withdrawals, and a variety of additional services aimed at enhancing the overall customer experience..
Contact: Jose Berjerano

Responsibilities:

- Create a new version that comply with actual security and new requirements
- Manage DigitalOcean
- Manage the passwords in AWS
- Manage the APIs for different blockchains provide developers with standardized interfaces to interact with decentralized networks, enabling them to access data, send transactions, manage smart contracts, and integrate blockchain functionality into applications. These APIs simplify communication with networks such as Bitcoin,

Ethereum, BNB Smart Chain, and others by offering endpoints for querying balances, tracking transactions, retrieving block information, and executing on-chain operations. By using blockchain APIs, developers can build more efficient, scalable, and user-friendly solutions without needing to run full nodes or manage complex blockchain infrastructure.

Environment: *VSCode, PostgreSql.*

VB.Net Developer **Oct 2022 - May 2024**
(Product development)

Client: **Bayview Loan Management**
Website: Bayview.com
Project: Capital markets, Property Inspection, Deal Management System, Default Tracking System, Capital Markets API
Technologies: VB.net, Access, VB6, MS SQL Server.
Scope: Convert applications from VB6 to VB.net using the company framework based on productivity pyramid..
Contact: Gino Prado

Responsibilities:

- Create the new ETL and Stored Procedures to write the information from Capital Markets to the Servicing Director. Using performance tools to improve the data workload.
- Create in Report Viewer reports
- Troubleshoot Windows 10 and Linux environments
- Analyze the current business need
- Strong C# skills
- Basic skills in Python
- Strong powershell skills
- Implement the new VB,Net application
- Get the new requirements from the business.
- Create a new version that comply with actual security and new requirements

Environment: *Visual Studio 2022, MS Sql Server, PostgreSql.*

Customizing Applications **Nov 2015 – Oct 2022**
(Product development)

Client: **EDIS**
Website: http://edis.io
Project: State of the Art Online Test Taking
Technologies: Angular JS, Bootstrap, ASP.NET MVC, Web API, MS SQL Server, PostgreSQL.
Scope: Design and develop an online test taking interface compliant with the highest industry standards for large K12 School Districts.
Contact: Jasan Alvarez, Chief Product Officer (CPO), jasan@edis.io, (239) 560-1537

Responsibilities:

- Customize the application for the functional requirements of the clients
- Implement new C# code adding the new requirements

- Updating Angular to a new behavior
- Updating the MVC corresponding layers

Environment: *ASP.NET, C#, Web Services, WCF, WPF, TFS 2010, VS 2008/2010, Crystal Report 2008, MS Report Viewer 2010, Visual Source Safe, SQL Server 2005/2008, SQL Server SSIS, MS Access, Javascript,HTML, XML, JQuery, LINQ, CSS, Entity Framework, IIS 6, Agile (Scrum).*

Cima-IT. **Nov 2013 – Aug 2015 (2 years)**
Consultant (Programmer Analyst)

Responsibilities:

- Maintenance and Support of ASP.Net Web application and Web Service layer.
- Enhanced the UI/UX interface with JavaScripts library and framework like JQuery 13.1, AngulaJS 1.2, JSTable.
- Enhanced the architecture of the integration services framework (SOA in .NET) for electronic sign of documents like invoices in Ecuador IRS web service.
- Upgrade of all .Net applications in a new Framework 4.5 with new threads development.
- Architect and Re-engineered the existing code to improve the application parameters.
- Development of ETL tool using command line data loader and .NET windows service for nightly integration between clients ERP self developed and INVOICEC.
- Developed and updated the SSIS packages of data migration from application to INVOICEC.
- Support and Maintenance of Integration for the 100% availability of the systems to the user and ensuring the data integrity between the two systems.
- Developed architectural specs, process and data flow diagrams and UML models etc. of various projects.
- Developed a new functional needs for INTERDIN CREDIT CARD of ECUADOR

Environment: *ASP.NET, C#, VB.Net, Web Services, WCF, WPF, TFS 2010, VS 2008/2010, Crystal Report 2008, MS Report Viewer 2010, Visual Source Safe, SQL Server 2005/2008, SQL Server SSIS, MS Access, Javascript,HTML, XML, JQuery, LINQ, Entity Framework, IIS 6, Agile (Scrum), IBM-AS400, WEBSPHERE, RPG-ILE, ECLIPSE, PostgreSQL.*

XY Prepago/Infoquality (GTEL) **Sep 2012 – Nov 2013 (1 year)**
Client – Resimodel, NY.
Consultant (Programmer Analyst)

Responsibilities:

- Integration and application development, deployment, testing (unit and systems), and iterative refinement.
- Developed artifacts that includes but not limited to Data Architecture, Application Architecture, Technology Architecture, process flow, data flow, package diagrams, component diagrams, class diagrams, sequence diagrams and logical and physical data models
- Responsible for maintaining TFS for code management of Development, Support and Production branches, merging the Development branch into Production after each Production release.
- Conducting **offshore** and **on-site** entire coordination assisting in devleopment and requirements task.
- Closely worked with the team for the system performance efficiency by Optimizing SQL Queries and improving application code.
- Also acted as a **scrum master** in daily stand up **(Scrum)** call taking the lead role of running and managing the meeting, understanding issues from business, requirements, technical and testing side and involved in making appropriate decisions.
- Customize a web based application in PHP in codeigniter framework to a new functional needs in the group organization

- Work with web service of a BANK of PACIFIC to pay a services like water and electric services
- Maintenance a web application to recharge mobile pins in a different platform with a cluster in Argentina and application servers in Spain.
- Renew the web application to a symphony MVC framework

Environment: *ASP.NET, C#, Web Services, TFS 2010, VS 2008/2010, Crystal Report 2008, Visual Source Safe, SQL Server 2005/2008, SQL Server SSIS, MS Access, Javascript, HTML, XML, JQuery, LINQ, Entity Framework, IIS 6, Agile (Scrum), ECLIPSE, PHP, Symphony, Codeigniter, Linux Debian, Linux UBUNTU, Windows Servers 2003/2008, PostgreSql.*

Mistral Caribe **Nov 2006 – Aug 2012 (6 years)**
IT Manager

Project: Mistral Systems
An in-house project that work with inventory in different areas like transportation, Restaurant and Supermarkets, It's a part of an ERP solution that have a (Point Of Sell) POS, Inventory and accounting modules including some analysis of customer such as best sells and time to buy a new products.

Responsibilities:

- Coordinating projects through agile SDLC methodology from all **Management**, **Technical** and **Service delivery** aspects.
- Plan, lead and coordinate activities of IT Business Solution projects to ensure goals and objectives of projects are accomplished within prescribed time frames
- Manage and develop the build plan for each **Iteration (Sprint)** within the given **time-box** working closely with the application manager.
- Involve in various Sessions with business, analyst and technical team understanding business needs and provide best **technical solutions** for the enhancements of the application.
- Involved in **database modeling, designing** and **architectural** specifications development providing expert judgment to produce the best scaled model for optimized application.
- Involved in **coding and development of features, web services and class wrappers** for new enhancements.
- Provide weekly and monthly task report containing **Key Updates, Accomplishments and KPI** details.
- Mentoring the development team to adopt best **programming practices** using general and technology based guidelines for **Microsoft Technologies**.
- Conducted code and test cases reviews and technical sessions with the development and testing team.
- Responsible for the deployment of build releases for different sprints and performed **smoke testing** including production release.
- Work with SQL Windows development environment for update the application functionalities, PostgreSql.
- Work with Delphi based windows application for POS

Notable Accomplishments

- Configuration Management for proper and secure source versioning and record keeping.
- Standardized Web Development Process Cycle and ensure successful execution for smooth transition of all the phases included Pre-sales, Requirements, Concept (Design), Implementation, Development, Testing, Deployment (hosting) for timely delivery.
- Improved Organizational Chart for successful handling of multiple projects.
- Carried out project based Resource Performance Measurement and their confirmation and annual appraisals.

Environment: *Centura, Gupta SQL Windows, C#, ASP.NET, Delphi, TCP communication, ole objects, SQL server 6.5,7,2000,2005.*

SKILLS:

Languages	C#, VB.Net, WPF, WCF, .Net Compact Framework, Remoting, Patterns & Practices, ADO.NET, Web Services, Java (JDK 1.8), VB 6.0, J2EE, RPG ILE, FOX PRO, Delphi, Pascal, SQL Windows.
Web Technologies	ASP.NET, ASP.NET MVC, ASP, JSP, JavaScript, VBScript, HTML, XML, XAML, XSL, CSS, AJAX, WSDL, ASMX, YAML, Web Services, Razor, Web 2.0, JQuery, PHP, Symphony
Databases	SQL Server 2005/2000/CE, MS Access, Oracle 9i, DB2, XML/Flat Files, PostgreSql, MySql.
Web/Application Servers	IIS 7.0, Personal Web Server, Xamp, Wamp, Easy PHP, Apache, J2EE Server
Development / Scripting / Testing Tools	Visual Studio 2005/2008/20012, Delphi, Centura, Gupta, Eclipse.
Design / Graphic Tools	Erwin, Visio, Magic, Adobe Photoshop, MS Front Page, Dreamweaver.
Reporting Tools	Crystal Report 4.5 & 8 & 10, SQL Server Reporting Services
Version Control	Visual Source Safe, TFS 2010/2012, Subversion
CMS	DotNetNuke, Joomla, WordPress.
PM Tools	MS Project 2007, MS Excel, MS Word.
Operating Systems	**Windows XP/Server 2003-2008/CE, AS400, Linux Debian/Ubuntu/Mint**

QUALIFICATION

Computer Software Engineer (BE) from Polytechnic University José Antonio Echeverría.

CERTIFICATIONS AND TRAINING

IBM-AS400	IPM-GS institute
IBM-RPG-ILE	IPM-GS institute
